Since the early beginnings until today, we continue the tradition of quality and perfection by using only the finest materials from every corner of the globe and by trusting only the most gifted and meticulous craftsmen.

By following the latest discoveries and innovation and by using state-of-the-art technology, our brand became a synonym of quality, fine detail, masterful creation...

For the Almero mattresses we source the best natural materials and we apply the latest global technologies. The skillful hands of our craftsmen carefully combine each element and pay attention to every detail when making the mattresses in order to provide you with the necessary comfort to have a perfect sleep.

Our beginnings date 30 years back when our production capacities covered a surface of only 1,000 square meters, and today we can boast production plants that cover a total area of 10,000 square meters.

We offer a wide line of products, ranging from spring mattresses with various characteristics to mattresses made of natural materials and without springs, as well as mattresses made with latex, coconut fibers and camel hair, and pillows. With an iconic design and carefully nourished reputation that was being refined for more than 30 years in order to deliver a quality, long-lasting and comfortable mattress that provides a support to your body every time you rest.

Almero is the first and only production plant in the Republic of Macedonia that is specialized only for the production of mattresses.

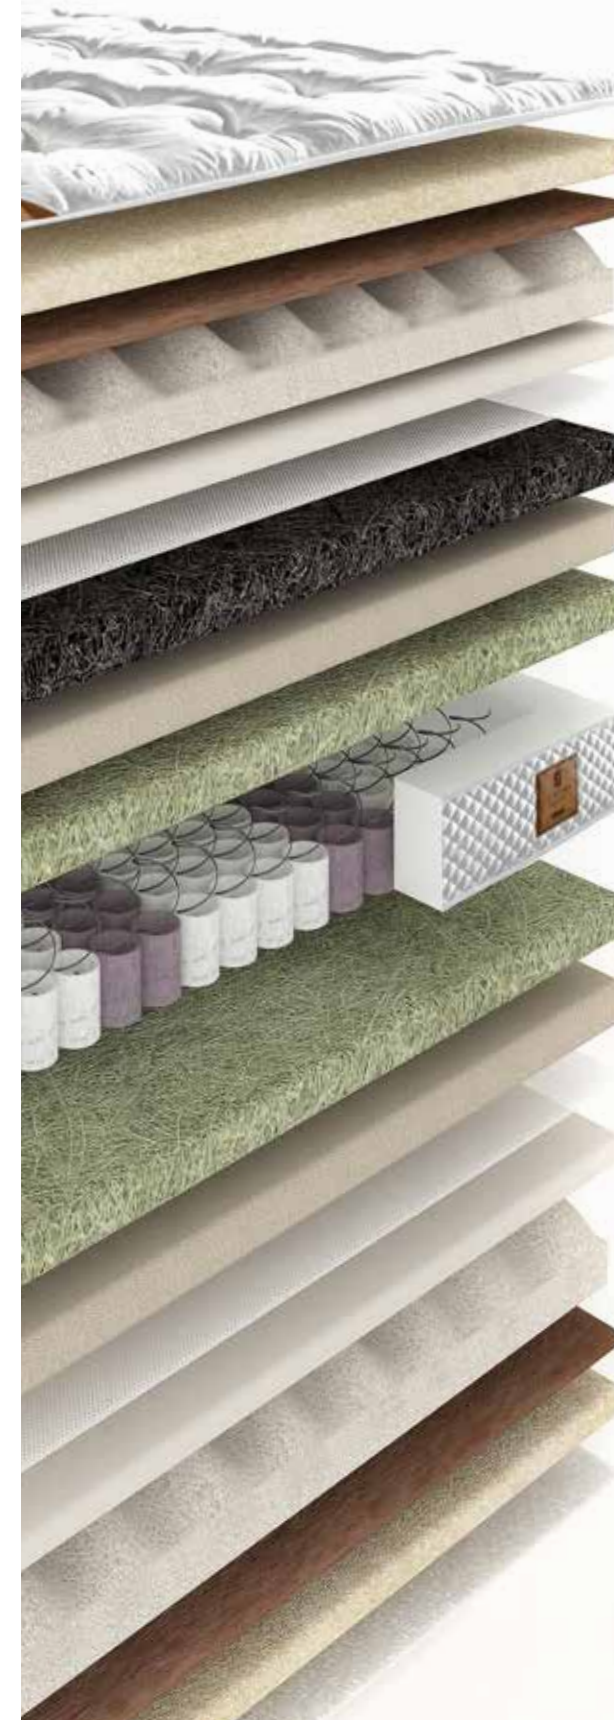

mantro esser

Luxury

Cactus Aloe Vera is widely used in the cosmetic & alternative medicine industry, due to its soothing & rejuvenating properties. This Cactus layer offers a naturally anti-bacterial & soothing environment for you.

Viscose Woven Fabric

Wool is warm when you're cold and cool when you're roasting. Wool is nature's performance material, and it's also incredibly flame-resistant!

Few materials can match horsehair when it comes to constructing a bed. Every single curled strand of horsehair works as a tiny spring, enhancing the work of our internal spring systems, providing support and pliability. Horsehair also comes with its own extremely effective, built-in ventilation system.

7 Zoning provides 7 zones of support which ensure better alignment and support. Produced using new generation technologies, Pocket springs continue to support the body for years without decreasing its performance. The springs that are individually packed move independently of each other and provide the correct support to the right spot, spouses experience nightless sleep without disturbing each other as they do not transmit.

Camel hair is an excellent choice for of the best temperature regulating fibres as the camel is found in extreme hot environments during the day, and freezing cold at night. Because thermal imbalance is often the single biggest cause of sleep disruption, it is crucial that your duvet regulates temperature and humidity as effectively as possible.
